Junior Scientists Participation Fellowship – David Lebœuf

After graduating from ESPCI, David Lebœuf pursued his Ph.D. at the Université Pierre et Marie Curie (UPMC-Paris 6) with Pr. Max Malacria until 2009 (on Co-, Rh-, and Au-catalyzed cyclizations). After 2.5 years of postdoctoral research at the University of Rochester with Pr. Alison Frontier (on Cu-mediated Nazarov cyclizations) and 1 year at the Institute of Chemical Research of Catalonia (ICIQ) with Pr. Antonio Echavarren (on the development of new Au-catalysts), he was appointed by the CNRS as Assistant Professor in 2013 at the Université Paris-Sud, where he is currently developing research program dedicated to calcium catalysis and supramolecular chemistry.
